Associate Software Engineer

Category: Software

Location: Prague, PR, Czech Republic

CA Technologies creates software that fuels transformation for companies and enables them to seize the opportunities of the application economy. Software is at the heart of every business in every industry. From planning, to development, to management and security, CA is working with companies worldwide to change the way we live, transact, and communicate – across mobile, private and public cloud, distributed and mainframe environments.

Job Overview:

This position is responsible for project-based work for creating, testing, ensuring the quality of and maintaining a module or aspect of a product. The **Associate Software Engineer** will perform non-complex code modification, testing, and debugging tasks.

Key Responsibilities:

Program Level Execution

- Work collaboratively within an Agile Team to write high quality, testable code that meets the Definition of Done:
 - Strive to meet team sprint commitments.
 - Participate in design and code reviews with other engineers.
 - May develop and utilize automated test scripts to perform duties.
 - Participate in test plan reviews.
- Actively support and contribute to end of iteration demos.
- Responsible for assigned integration, testing and deployment tasks.

Release/PI Planning

- Actively participate in Release Planning:
 - Support the Agile Team in agreed upon achievable PI Objectives.

Iteration Planning

- Prepare for Iteration Planning, including:
 - Actively participate in backlog refinement sessions in collaboration with other Agile team members.
 - Actively participate in team planning and contributing to team goals.
 - Volunteer for and commit to delivering stories and tasks within the sprint.

Enable Agility

- Learn the principles behind the Agile Manifesto in all interactions.
- Work within a self-directed Agile team; learn from team members and assigned mentor, commit to work and contribute to the outcome.
- Cultivate a passion for delivering high quality products aligned with customer needs.
- Employ continuous learning; build domain expertise.
- Actively communicate and collaborate within the team.

Typical Role definition:

Professional Staff. Works under general supervision. Has learned the fundamental concepts, practices, and procedures of a particular field of study, not yet the formal application of these concepts, practices, and procedures.

Job-Specific Authority and Role:

- Manager is consulted for decisions
- Typically has no direct reports.
- Typically has no total staff.
- Typically has a global geographic focus.
- Typically does not manage a budget.

Business Travel and Physical demands:

Business travel of approximately 10 percent yearly is expected for this position.

Physical demand:

- Office environment. No special physical demands required.

Preferred Education:

Bachelor's degree or global equivalent in a related field.

Work Experience:

Typically 0 to 2 years of experience in software development or a related field.

Skills & Competencies:

- Demonstrates high personal integrity and ability to earn trust from others.
- Demonstrates a growth mind-set, seeks feedback often and is effective in continuous personal and professional development.
- Participating in self-directed learning activities aimed at developing expertise within technical domain, including reading relevant publications, participating in domain forums or groups etc.
- Debugging/coding skills.
- Problem solving skills.
- Communication and organization skills.
- Teamwork skills.

Our Mission – we eliminate barriers; the barriers between ideas and outcomes. At CA Technologies your passion and expertise can directly impact the business and you'll help offer our customers practical approaches to delivering new, innovative services and value through IT. We love the game, and never stop chasing greatness.
