## Diploma Thesis

Company	Title	Abstract
Daimler AG	"Development and Validation of a new vehicle multimedia Universal Consumer Interface"	The Diploma Thesis accomplishes the design and implementation of an automatic testing system for a Universal Consumer Interface (UCI). The UCI, is an in-vehicle electronic device, which interacts through the backbone telematic network with the vehicle radio, and offers to our customers the possibility to plug multiple music portable player and multimedia devices (iPod, USB, etc.). The project includes validation of the in-vehicle telematic network, automatization of tests at our laboratories, as well as bench & in-vehicle testing in new Mercedes Benz prototypes. This design and implementation is completed with manual testing of the device in real environment, including error detection, error report, trace analysis and dealing with the device manufacturer.
